Experiment-2

Study of different types of network cables and crimping of cable with RJ45 connectors.

Aim:

To study different types of network cables and to prepare a straight through and cross over Ethernet cable by crimping RJ45 connectors.

Requirements:

UTP cat5e/cat cables, RJ45 connector, crimping tool, cable stripper, cable, tester, scissor.

Cable types:

1) UTP -> unshield twisted Pair (UTP)
   - category 3 - 10 mPPs
   - category 5 - upto 100 mbPs
   - category 5e - upto 1Gb Ps
2) STP -> shield twisted Pair (STP) cable
   - category 6 - upto 1Gbps.
   - SSTP - category - upto 10 GPPS.

Crimping of network cables with

RJ45 connector.

RJ45 :

1 white
2 white green
3 green
4 white orange
5 blue
6 white blue
7 orange
8 Brown.

Procedure:

i) To start construction of the device, begin by threading.

ii) Next, strip approximately 1.5cm of cable shielding from both ends.

iii) After you will need to untangle the be four twisted pairs.

iv) Once the order is correct, bunch them together in Live.

Result

thus, the types of network cables are decided and crimped the cable with RJ45 connector is successfully written
